EMAIL ADDRESS: [amministrazione@demiccometalli.it](mailto:amministrazione@demiccometalli.it)

PEC ADDRESS: [demiccometallisrl@pec.it](mailto:demiccometallisrl@pec.it)

### **The origins...**

De Micco Metalli S.r.L. has been dealing for over twenty years with the transport, storage and recovery of ferrous and non-ferrous materials, in order to transform industrial processing waste into secondary raw materials to be reintroduced into the production cycle.

### **The turning point...**

In 2015 the De Micco family, thanks to important economic investments, decided to expand the company by opening a new recovery plant in the industrial area of San Marco Evangelista (Ce). The storage site covers a total area of over 13,000 square meters of which approximately 5200 square meters are intended for storage and recovery and about 600 square meters are intended for the administrative offices of the company.

### **Company policy and quality objectives UNI ISO 9001. 15**

De Micco Metalli, aware of the importance and need to demonstrate and document to its customers the company's ability to continuously supply products that comply with the specifications, has deemed it appropriate to establish a Quality System in accordance with the Quality assurance requirements contained in the UNI standard. EN ISO 9001: 2015. The principles of this rule form the basis of corporate policy and essentially aim:

- to increase customer satisfaction;
- to demonstrate the ability of De Micco Metalli to regularly supply products that comply with customer requirements and with applicable mandatory ones.

Furthermore, the adoption of the quality management system has the following objectives:

- Increase the commercial potential of the company;
- Reduce production costs;
- Protect the environmental impact through the use of the best technologies available in the sector.

### **Partnerships and European markets**

Continuous improvement and attention to recovery processes have also opened the doors to foreign markets. Our customers on the national territory are represented by the major companies in the steel and metallurgical sector.

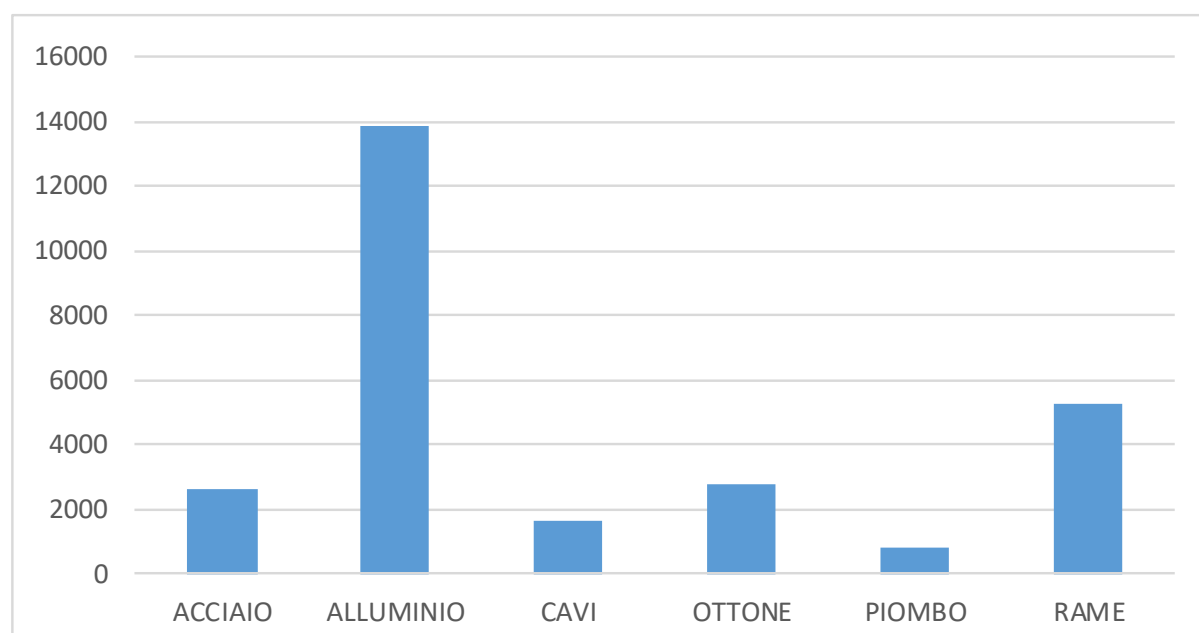

### **Our commercial numbers ...**

Our company has always recovered and traded large quantities of scrap sent for recovery including ferrous scrap such as 304, 316 stainless steel and non-ferrous scrap such as copper, brass, bronze, aluminum, cables, carters, etc.

The quantities managed in the year 2021 are shown below

***(Total: about 27,000 tons)***

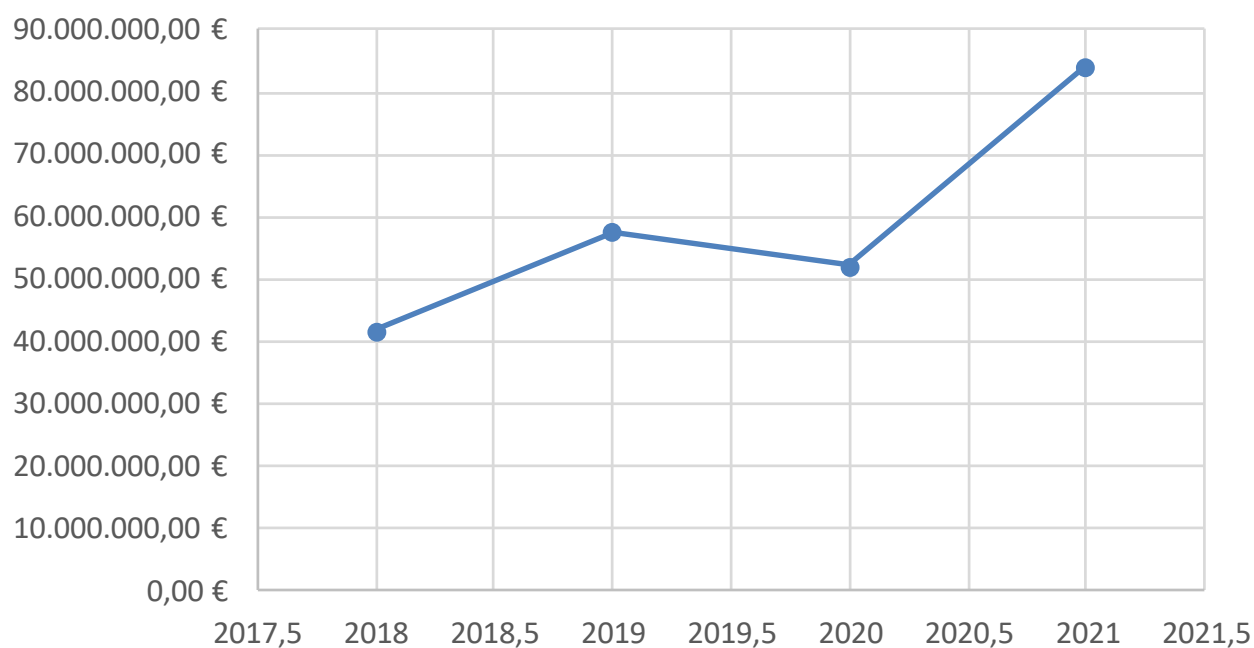

## Our turnover ...

Our company is constantly growing also on an economic level, as shown by the balance sheet numbers which led to an increase in turnover of approximately + 102%

ANNO	FATTURATO	INCREMENTO %
2018	41.649.942,64 €	<b><u>102%</u></b>
2019	57.502.911,46 €	
2020	52.226.612,68 €	
2021	84.184.935,47 €	

### FATTURATO

### **Technical and organic equipment of personnel**

For our services we use state-of-the-art equipment, roll-off bins, authorized vehicles, constantly checked to ensure quality and efficiency.

**The De micco Metalli in its staff has about 30 employees including skilled workers, drivers, administrators and environmental engineers.**

The company constantly invests in machinery and equipment, integrating new technologies in order to increase the productivity of the plants and the quality of their production, in fact De Micco Metalli has the following technological equipment attached to the production cycle:

- Compacting press model Taurus;
- Roll-off compacting press model BB44.D;
- Alligator shear;
- Cable stripper;
- Slow motion shredder and rotating blades model Marivan srl;
- Self-propelled crane loaders, forklifts and trucks.
- Panizzolo srl brand metal crusher with adjoining plant for separation and dust suppression of the latest technology;
- Roll-off containers and crates of various cubes;
- Container tipping station;
- Barriers for radiometric control of loads entering and / or leaving the plant, model Raycom srl.

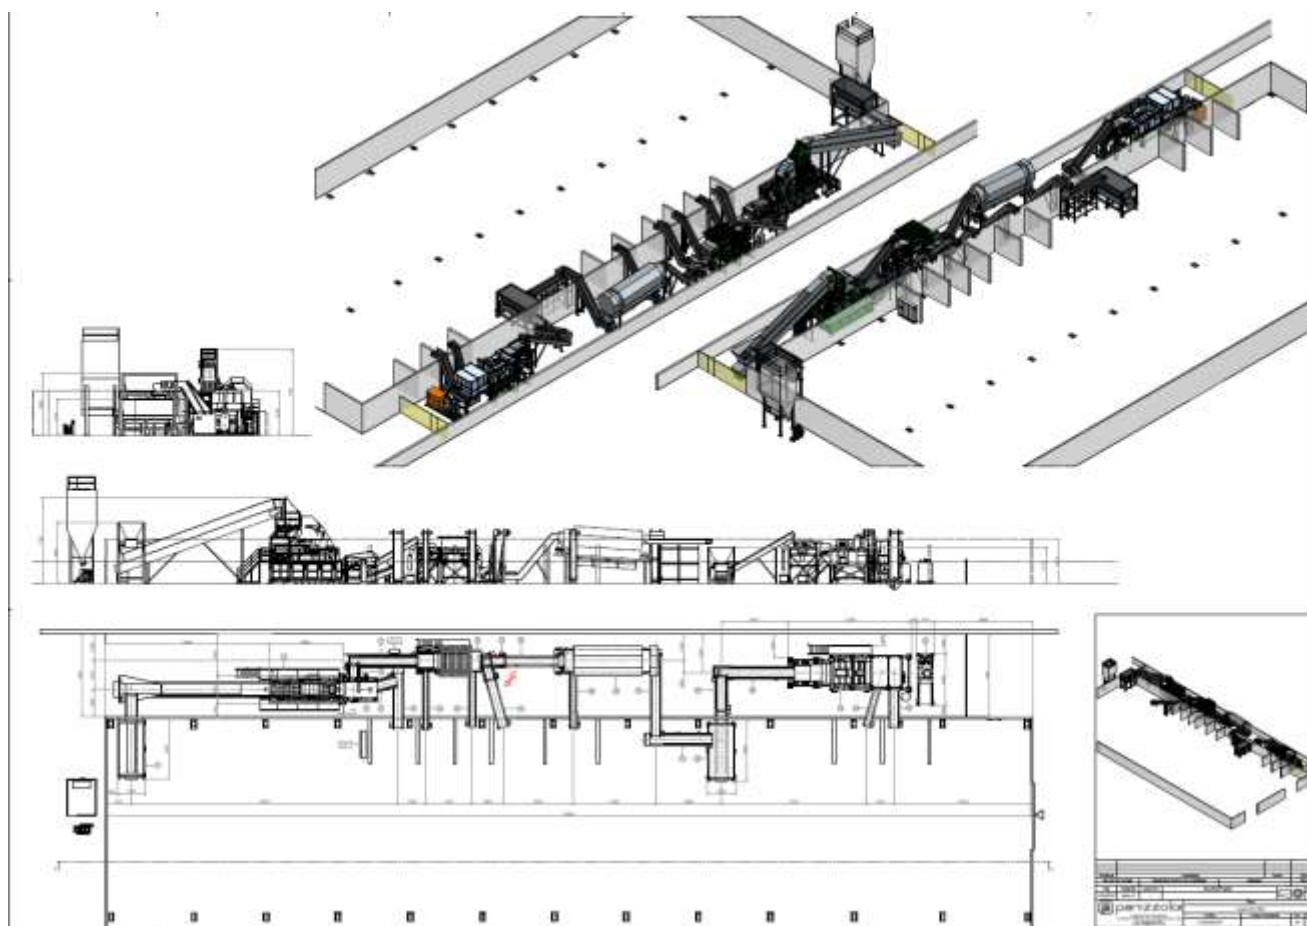

### Investments made and planned ....
